

SOMERSET STUDENTS FUNDRAISE FOR CROSS CONSERVATION AREA

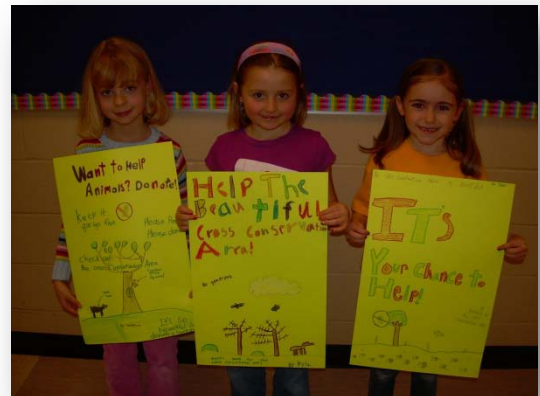

As described by teacher Josie Baines

Our grade 2 students visited your site on December 2nd and 3rd of last year. As a follow up to our visit our students wrote letters to all of the other classes and designed posters to educate their classmates about the role of the Cross Conservation Area. They also did a loonie and toonie fundraiser to support the cause. This was a great event for our students as the initiative was theirs, the project was designed by them and they involved the whole school. Of course, we hope that by motivating them as youngsters we will create powerful, community minded adults.

We ended up collecting \$230.16 in total. It ended up being an excellent math lesson as well, as the students worked on their own strategies for counting the totals from each classroom and then finding the grand total.
